1 Probability, Conditional Probability And Bayes Formula In The Die-toss
Example, Events $A = \{3, 4, 5, 6\}$ And $B = \{3, 4, 5, 6\}$ Are Not Mutually Exclusive, Since The

Outcome F_3 belongs to both of them. On the other hand, the events $A = F_3$ and $C = F_1$ are mutually exclusive. The union $A \cup B$ of two events A and B is an event that occurs if at least one of the events A or B occur. The key word in the definition is "at least one".
