Calculators appeared, and handheld “four-bangers” capable of adding, subtracting, multiplying, and dividing were available by the early 1970s. Then, in 1972, Hewlett-Packard introduced the HP-41C, a handheld calculator that was a breakthrough in portability and functionality. It was the first handheld calculator to use a single integrated circuit (IC) for all calculations, and it was the first to have a liquid crystal display (LCD) screen. The HP-41C was a major success for Hewlett-Packard, and it helped to establish the company as a leader in the handheld calculator market.
