Solutions To Homework #3. 2X B X G Closed Ball Of Radius ...

$N = X$ for all $N \in M$. (b) Prove that any function $f : X \rightarrow Y$ is continuous in two different ways: first using sequential definition of continuity and then using the ϵ -definition. Solution: (a) Suppose that there exists $M \in \mathcal{N}$ and $x \in X$ such that $x \in M$ for all $N \in \mathcal{N}$. Then for any $\epsilon > 0$ we have $D(x; x) = 0$
